REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-10 recite a nonvolatile memory device comprising a memory cell array, wherein each of the memory cells includes a source region, a drain region, a channel region between the source region and the drain region, a word gate and a select gate disposed to face the channel region, and a nonvolatile memory element formed between the word gate and the channel region, wherein the memory cell array includes: a wordline-and selectline driver section which drives the wordlines and the selectlines, wherein the wordline-and-selectline-driver-section includes a plurality of unit wordline-and-selectline-driver-section, and wherein each of the unit wordline-and-selectline driver sections drives the select gates and the word gates of the memory cells in each row at a single potential.

The prior art does not teach or suggest the memory device having all the above elements as recited in independent claim 1. Therefore, the application is in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
